

2015 HIA-CSR ACT/Southern NSW Housing Awards

ADVERTISING FEATURE

G8089350AA-151115

Canberra's design and build extension specialist

Over the years Build Professional has won a number of industry awards and, most recently, delivered outstanding results again at the HIA Awards, where it took out the 2015 HIA ACT/Southern NSW Professional Small Builder of the Year Award and Renovation/Addition Project \$200,001-\$350,000.

While Build Professional is proud of this recognition for the work of its talented team, winning awards is never the intention. Its intention is always to deliver every client with a great experience, great outcomes and great value for their home extension and renovation.

Build Professional specialises in providing a complete

design and build service for home extensions and remodelling projects. It is through the Build Professional client-focussed approach that quality design and construction come together to improve homes, and ultimately, lifestyles.

"When you engage us to design and construct your home extension or remodelling project we will manage every aspect of the job from conception through to completion," Build Professional director Matthew Hall said.

"Our clients have access to specialists that utilise carefully developed systems to assess your requirements, develop your design documentation, manage planning

The dedicated Build Professional team.

approvals and deliver your completed project in an exceptional manner."

The Build Professional team understands design and construction, and offers specialised skills in blending creative design with their knowledge of structures and a fundamental understanding of the costs of remodelling work.

This approach is inherently efficient providing greater control over the entire timetable, from the seed idea to completion of construction. Build Professional's sophisticated coordinating, estimating and scheduling systems ensure control and delivery of the project.

"Most of our clients choose

to remain living in their home while it is being renovated and it takes experience, careful planning and specialised knowledge to ensure that your home, our work-site, can also continue to be a place where you live," Mr Hall added.
